There has always been a zeal inside my heart to sharpen my axe to meet the challenges of the growing technology developments. I wish to hone my talent to perfection and I believe a Master's in HCI will give me the proper direction and play a vital role for kindling the fire for technology inside me.

WORK EXPERIENCE

Software Engineer (Front-End) JPMorgan Chase & Co.

07/2017 – Present

Mumbai Area, India

Achievements/Tasks

- Currently working on UI/UX for the tooling platform which integrates multiple modules like trade analysis engine, reprocessing anomaly detection, monitoring and predicting trade workflow lifecycle.
- Figuring out new interactions with business, developers, and other designers to improve the user experience on my team's product through user flows, mockups, prototypes, and usability testing.
- Seeing our designs through from conception to release, which includes discovery, development, and post-release validation. Working with my team members to find better methods of implementing design and remote communication into the current process.
- Stack: React.JS, TypeScript, Balsamiq Wireframes
- Worked on post trade processing of credit derivative trades. Was involved with continuous integration and delivery for the parent application.
- Stack: Java, Mule, XML, SQL, JSON
- During my beginning phases at JP, I worked on developing a couple of modules in the trade processing system which accepted trades from restful services in various formats (like FPML) and converted them all to a unified format to make further amendments on them.
- Stack: Java, Mule, SQL, XML, JSON

PROJECTS

React based Random Startup Name Generator (Clone for ThisForThat) (09/2018 – 10/2018)

- This react application is a visually distinct clone to <http://itsthisforthat.com>
- Demo Links - <https://bit.ly/2yTcly2>
- GitHub Link - <https://bit.ly/2H0k2H4>

Evento [A Event Management Tool] (05/2016 – 07/2016)

- Developed a system that could help in managing university events organised throughout the year.
- The functionalities included were: News Bulletin, User Registration, Real time Notifications, Custom Dashboard, Desktop and Mobile Compatible.
- Technology Stack: PHP, MySQL, HTML 5.0, CSS, AJAX, JQuery for Mobile.

VesMart [B.E. Final Year Project] (2017)

- VesMart was about simulation and hosting of an e-commerce web portal including both buyer and seller modules and all functionalities seen in a cart.
- Functionalities : User Registration, Seller and Buyer Dashboard, Cart Logic, Recommendation Logic (Used a Bayesian Network to recommend similar products), Payment Gateway Integration, RealTime Chat., Desktop and Mobile Compatible, Chat Environment.
- Technology Stack: PHP, MySQL, HTML 5.0, CSS, Bootstrap, JQuery for Mobile, AJAX, Python for building the Recommender Logic.

VOLUNTEER EXPERIENCE

Assistant Placement Co-ordinator Mumbai University (@Vesit)

08/2016 – 07/2017

Assistant Event Head Praxis @ Vesit

07/2016 – 08/2016
